

Mustafa Nalbantli

Analytics Engineer / Data Analyst

Chattanooga, TN · mustafanalbantli@gmail.com · mnalbantli.github.io

EXPERIENCE

Data Analyst (Graduate Assistantship) | OPEIR

University of Tennessee at Chattanooga · Jan 2025 – Apr 2026

- Rebuilt UTC's institutional Factbook pipeline (Alteryx, Power BI, Streamlit) after two earlier tool choices fell short, catching multiple pre-publication reporting errors.

Case study → mnalbantli.github.io/factbook-detail.html

- Unified 153K+ siloed enrollment records into one pipeline, correcting two institutional errors that had misstated retention and graduation metrics.

Case study → mnalbantli.github.io/student-success-detail.html

Business Development, Data-Driven Operations | DIMER

Turkey · Jan 2024 – Dec 2024

- Standardized DIMER's pricing/quoting process (~\$2M gross revenue, 8 field staff), cutting quote turnaround from an estimated hour to about 10 minutes.

SELECTED PROJECTS

Mean Mug Growth Analytics (self-directed)

- Caught a customer-independence violation before testing campaign-lift data; used Welch's t-test and Glass's delta — found no lift reached significance ($\alpha=0.05$).
- Built a full hybrid-cloud analytics stack (dbt, BigQuery, Power BI) for a simulated retail business — 30 dbt models, 17 automated data-quality tests.

Case study → mnalbantli.github.io/mean-mug-detail.html

Student Early-Warning Retention Model (MS Capstone)

- Built a dropout-prediction model (scikit-learn) for UTC's retention office, achieving 0.917 ROC-AUC after removing a target-leakage bug from an earlier version.

Case study → mnalbantli.github.io/retention-model-detail.html

EDUCATION

MS Data Analytics — University of Tennessee at Chattanooga, Rollins College of Business

GPA 4.0 · Expected Dec 2026

BA Marketing — Istanbul Bilgi University

GPA 3.22 · 2020–2024 · Erasmus semester, International Business, ISM Dortmund (Germany)

SKILLS

Tools & Languages: Python (pandas, scikit-learn, scipy) · SQL · dbt · DAX · BigQuery · Power BI · Alteryx · Streamlit · Git/GitHub

Methods: Statistical hypothesis testing · RFM/LTV modeling · cohort analysis · ETL pipeline design
